

Earth Day!

Earth who gives to us our food, sun who makes it ripe and good,
dear sun above and earth below our loving thanks to you we show

Reverence for the earth in our daily rhythm

I find myself appreciating the natural beauty of the earth, have you started a garden in your home? Are there plants around you that are in bloom? Gather a bouquet for earth day and put it on your table at home.

Sun Prints Activity

<https://tinkerlab.com/fall-sunprints/>

There is really neat sun print material you can buy and do this activity at home. The fabric could be used for making a cape, pillows, a bag and more!

Sea shell Mobile

I visited a local beach a while back and found many oyster shells lying around, many had holes in them so I collected a few to bring home. Last week I strung them to an embroidery hoop to make a nature mobile!

Of course you can use all sorts of materials to do this but found the shells to be beautiful. They could hang indoors or out!

(A Cash unicorn spotted!)
